

Unit 7: Geometry and Measurement Word Problems

LA State Standards	Practice	Skill	Example/Note
3.OA.8	Practice	Solve two-step word problems using the four operations.	Tracy's mom gave her \$65 to go shopping. She bought a sweater for \$10, a T-shirt for \$10, and a pair of shoes for \$10. How much money does Tracy have left?
3.G.1	Practice Practice Practice Practice	Identify attributes of 2-dimensional shapes.	Which are parallelograms? 
3.MD.4	Practice	Generate measurement data by measuring lengths of objects.	Create a line plot using data or generating data.
3.MD.8	Practice Practice Practice	Identify perimeter.	What is the perimeter of a square with a side length of 4 units?
3.MD.8	Practice	Solve problems involving perimeter and/or area.	A bakery is 13 meters wide and 23 meters long. The baker wants to put a wooden shelf around the inside of the bakery. The wooden shelving costs \$3.00 per meter. How much will the baker's shelf cost?
3.MD.8	Practice	Find an unknown side length when given the perimeter.	The perimeter of a triangle is 8 units. One side length is 2 units. A second side length is 3 units. What is the third side length of the triangle?
3.MD.9	Practice Practice	Solve word problems involving money.	Carrie has 3 quarters. Darnel has 2 dimes. How much money do they have in all?
